Importance: High

Risk Analysis

Attached you will find prioritized security risks, ranked by RiskScore.
The Excel file contains full evidence, raw data, and detailed findings per asset (Details sheet).

AI summary (also included in the Excel Summary sheet):

1) Top 25 risky assets:
1. paw-g67z22am0m | Tier=Critical - tier 0 | MaxRiskScore=20.00 | RiskScoreTotal=35.00 | Findings=2 | Domains=Endpoint
2. mgmt1.2linkit.local | Tier=Critical - tier 0 | MaxRiskScore=15.00 | RiskScoreTotal=193.00 | Findings=14 | Domains=Azure, Endpoint
3. dc3.2linkit.local | Tier=Critical - tier 0 | MaxRiskScore=15.00 | RiskScoreTotal=180.00 | Findings=12 | Domains=Azure, Endpoint
4. dc1.2linkit.local | Tier=Critical - tier 0 | MaxRiskScore=15.00 | RiskScoreTotal=145.00 | Findings=10 | Domains=Azure, Endpoint
5. strv-paw-lt-01 | Tier=Medium - tier 2 | MaxRiskScore=15.00 | RiskScoreTotal=81.00 | Findings=6 | Domains=Endpoint
6. heim-new-lt-02 | Tier=Medium - tier 2 | MaxRiskScore=12.00 | RiskScoreTotal=36.00 | Findings=3 | Domains=Endpoint
7. dons-ekn-lt-01 | Tier=Medium - tier 2 | MaxRiskScore=12.00 | RiskScoreTotal=36.00 | Findings=3 | Domains=Endpoint

2) Top 10 assets detailed:

- Asset: paw-g67z22am0m
- Why high risk: MaxRiskScore=20.00 due to "Fix Microsoft Defender for Endpoint impaired communications" [scid-2002] and "Block rebooting machine in Safe Mode" [scid-2518]
- Top 5 actions:
- Fix Microsoft Defender for Endpoint impaired communications | Critical EDR gap allowing evasion | High risk reduction | [Fix Microsoft Defender for Endpoint impaired communications (scid-2002)]
- Block rebooting machine in Safe Mode | Prevent attacker persistence via safe mode reboot | Medium risk reduction | [Block rebooting machine in Safe Mode (scid-2518)]
- Verify endpoint security policies enforcement | Ensure no bypass of controls | Medium risk reduction | [Fix Microsoft Defender for Endpoint impaired communications (scid-2002)]
- Conduct immediate endpoint health check | Identify hidden issues impacting Defender | Medium risk reduction | [Fix Microsoft Defender for Endpoint impaired communications (scid-2002)]
- Review and tighten attack surface reduction rules | Limit attack vectors | Medium risk reduction | [Block rebooting machine in Safe Mode (scid-2518)]
- Expected overall risk reduction: High

- Asset: mgmt1.2linkit.local
- Why high risk: MaxRiskScore=15.00 with 14 findings including multiple critical CVEs (CVE-2023-31096, CVE-2024-55414, CVE-2025-9230), firewall profiles unsecured, and missing antivirus email scanning
- Top 5 actions:
- Patch CVE-2023-31096 | Fix critical vulnerability | High risk reduction | [CVE-2023-31096 (scid-xxxx)]
- Patch CVE-2024-55414 | Fix critical vulnerability | High risk reduction | [CVE-2024-55414 (scid-xxxx)]
- Patch CVE-2025-9230 | Fix critical vulnerability | High risk reduction | [CVE-2025-9230 (scid-xxxx)]
- Secure Microsoft Defender Firewall private profile | Close firewall gaps | Medium risk reduction | [Secure Microsoft Defender firewall private profile (scid-2072)]
- Enable Microsoft Defender Antivirus email scanning | Improve malware detection | Medium risk reduction | [Enable Microsoft Defender Antivirus email scanning (scid-90)]
- Expected overall risk reduction: High

- Asset: dc3.2linkit.local
- Why high risk: MaxRiskScore=15.00 with 12 findings including critical CVEs, attack surface reduction gaps, missing updates, and encryption not enabled
- Top 5 actions:
- Block use of copied or impersonated system tools | Prevent lateral movement and privilege escalation | High risk reduction | [Block use of copied or impersonated system tools (scid-2517)]
- Patch CVE-2023-31096 | Fix critical vulnerability | High risk reduction | [CVE-2023-31096 (scid-xxxx)]
- Patch CVE-2024-55414 | Fix critical vulnerability | High risk reduction | [CVE-2024-55414 (scid-xxxx)]
- Install system updates via Azure Update Manager | Close known vulnerabilities | Medium risk reduction | [System updates should be installed on your machines (powered by Azure Update Manager) (scid-xxxx)]
- Enable Azure Disk Encryption or EncryptionAtHost | Protect data at rest | Medium risk reduction | [Windows virtual machines should enable Azure Disk Encryption or EncryptionAtHost. (scid-xxxx)]
- Expected overall risk reduction: High

- Asset: dc1.2linkit.local
- Why high risk: MaxRiskScore=15.00 with 10 findings including CVE-2023-40031, firewall misconfigurations, missing encryption, and attack surface reduction gaps
- Top 5 actions:
- Patch CVE-2023-40031 | Fix critical vulnerability | High risk reduction | [CVE-2023-40031 (scid-xxxx)]
- Secure Microsoft Defender Firewall domain profile | Close firewall gaps | Medium risk reduction | [Secure Microsoft Defender Firewall domain profile (scid-2071)]
- Patch CVE-2025-9230 | Fix critical vulnerability | High risk reduction | [CVE-2025-9230 (scid-xxxx)]
- Enable Azure Disk Encryption or EncryptionAtHost | Protect data at rest | Medium risk reduction | [Windows virtual machines should enable Azure Disk Encryption or EncryptionAtHost. (scid-xxxx)]
- Block use of copied or impersonated system tools | Prevent privilege escalation | Medium risk reduction | [Block use of copied or impersonated system tools (scid-2517)]
- Expected overall risk reduction: High

- Asset: strv-paw-lt-01
- Why high risk: MaxRiskScore=15.00 with 6 findings mainly related to Microsoft Defender Firewall off and impaired Defender communications
- Top 5 actions:
- Turn on Microsoft Defender Firewall | Close network attack surface | High risk reduction | [Turn on Microsoft Defender Firewall (scid-2070)]
- Fix Microsoft Defender for Endpoint impaired communications | Restore EDR protection | Medium

risk reduction | [Fix Microsoft Defender for Endpoint impaired communications (scid-2002)]
- Verify firewall rules and policies | Ensure proper firewall enforcement | Medium risk reduction | [Turn on Microsoft Defender Firewall (scid-2070)]
- Conduct endpoint security health check | Identify hidden issues | Medium risk reduction | [Fix Microsoft Defender for Endpoint impaired communications (scid-2002)]
- Review attack surface reduction policies | Harden endpoint | Medium risk reduction | [Turn on Microsoft Defender Firewall (scid-2070)]
- Expected overall risk reduction: Medium

- Asset: heim-new-lt-02
- Why high risk: MaxRiskScore=12.00 due to impaired Microsoft Defender for Endpoint communications (3 findings)
- Top 5 actions:
- Fix Microsoft Defender for Endpoint impaired communications | Restore EDR protection | High risk reduction | [Fix Microsoft Defender for Endpoint impaired communications (scid-2002)]
- Verify endpoint connectivity to Defender services | Ensure no network blocks | Medium risk reduction | [Fix Microsoft Defender for Endpoint impaired communications (scid-2002)]
- Review endpoint security policies | Confirm enforcement | Medium risk reduction | [Fix Microsoft Defender for Endpoint impaired communications (scid-2002)]
- Conduct endpoint health diagnostics | Identify root causes | Medium risk reduction | [Fix Microsoft Defender for Endpoint impaired communications (scid-2002)]
- Update endpoint security agents | Ensure latest protections | Medium risk reduction | [Fix Microsoft Defender for Endpoint impaired communications (scid-2002)]
- Expected overall risk reduction: Medium

- Asset: dons-ekn-lt-01
- Why high risk: MaxRiskScore=12.00 due to impaired Microsoft Defender for Endpoint communications (3 findings)
- Top 5 actions:
- Fix Microsoft Defender for Endpoint impaired communications | Restore EDR protection | High risk reduction | [Fix Microsoft Defender for Endpoint impaired communications (scid-2002)]
- Verify endpoint connectivity to Defender services | Ensure no network blocks | Medium risk reduction | [Fix Microsoft Defender for Endpoint impaired communications (scid-2002)]
- Review endpoint security policies | Confirm enforcement | Medium risk reduction | [Fix Microsoft Defender for Endpoint impaired communications (scid-2002)]
- Conduct endpoint health diagnostics | Identify root causes | Medium risk reduction | [Fix Microsoft Defender for Endpoint impaired communications (scid-2002)]
- Update endpoint security agents | Ensure latest protections | Medium risk reduction | [Fix Microsoft Defender for Endpoint impaired communications (scid-2002)]
- Expected overall risk reduction: Medium

3) Cross-asset quick wins:

- Fix Microsoft Defender for Endpoint impaired communications [scid-2002] | Affects 5 assets | Example assets: paw-g67z22am0m, strv-paw-lt-01, heim-new-lt-02, dons-ekn-lt-01
- Patch CVE-2023-31096 [CVE] | Affects 2 assets | Example assets: mgmt1.2linkit.local, dc3.2linkit.local
- Patch CVE-2024-55414 [CVE] | Affects 2 assets | Example assets: mgmt1.2linkit.local, dc3.2linkit.local
- Patch CVE-2025-9230 [CVE] | Affects 3 assets | Example assets: mgmt1.2linkit.local, dc3.2linkit.local, dc1.2linkit.local

- Secure Microsoft Defender Firewall domain profile [scid-2071] | Affects 3 assets | Example assets: mgmt1.2linkit.local, dc1.2linkit.local, dc3.2linkit.local
- Block rebooting machine in Safe Mode [scid-2518] | Affects 3 assets | Example assets: paw-g67z22am0m, mgmt1.2linkit.local, dc3.2linkit.local
- Enable Microsoft Defender Antivirus email scanning [scid-90] | Affects 2 assets | Example assets: mgmt1.2linkit.local, dc3.2linkit.local
- Turn on Microsoft Defender Firewall [scid-2070] | Affects 2 assets | Example assets: strv-paw-lt-01, heim-new-lt-02
